postmortem one must die (extended cut)

I got this game super cheap but I found it just wasn't for me. I get the sense this is a sole developer, not a team or anything like that. Hats off, he's done more than I could. What I thought this game would be, based on the description, would be a fairly simple space combat simulator... Take Freelancer, strip out the mining, trading, and exploration, replace all that with loot and upgrades, so then you get something like Diablo in space right? Action combat with some RPG elements? Unfortunately it just doesn't work. It plays more like a tech demo or proof of concept than an actual game.

At least it was cheap?. While running through the free card games on steam, I stumbled across Hidden Dimensions 3. Since it was a SciFi themed game, it immediately skipped to the top of my playlist.

Then I was stuck in an absolutely tiny window reading an excessive amount of text in the tutorial because I couldn't adjust the resolution once the tutorial began. I admit, that soured me on the game.

As for the tutorial itself, it was thorough and explained things fairly well, BUT it didn't feel like I learned how to truly play since I was simply told the rules and told what to play when. The tutorial is both very good and not a proper introduction to playing.

Giving the game another chance does reveal a lot of good things about it. The ships are good. There is excellent variety and quality art. The game design and game play is reasonable and well thought out. Unfortunately the game feels too slow over all. Even playing with a speed human deck it feels like you are grinding away in order to win.

If you are looking for a new card game, you could certainly do worse. This game doesn't make it into my recommend list, but that doesn't mean it won't make it into yours.. Not working on VR.. This is a cute adventure game designed/programmed by a lady. Sometimes it feels a little childish but it is funny in a cheesy way. See if you can get it on sale!. "There is a keyhole here, i just need the key!". I appear to be currently going through a "tower defense phase" and it's lots of fun. Having recently completed [Iron Sea Defenders](#) and wanting more of the same, I quickly picked up [Fort Defense](#) on sale. It turns out it's pretty much a reskin of that, the main thematic difference being that this is fantasy-themed and Iron Sea is... pseudo-real/modern. Chronologically, Fort Defense is actually the younger game by around a year and it shows. There are some issues here:

- [graphics are blurry](#)
- [the music loop is way too short and gets annoying eventually \(not immediately\)](#)
- [barrel \(premium currency\) progression is random, which leads to farming and grinding](#)
- [seems like there is no keyboard control for changing game speed](#)
- [some cosmetic bugs such as missing spaces in the writing or star counter getting broken](#) All of these and more ended up being addressed in [Iron Sea Defenders](#) so it's a welcome conclusion that the developer has been improving. As for [Fort Defense](#), it's still a passable tower defense but kinda barely. Get it on sale.. Great game with a 1980 feel, especially if you're familiar with Mario Bros.

[Amazing music as well, as you collect pennies from defeated enemies \(by throwing certain objects\) while trying not to die.](#)

[EDIT: With the Deluxe version out, this game has turned into a masterpiece, adding in more maps, characters, and even bosses! \(There's another type of POW block in there after beating the boss, but you'll have to find out yourself.\). I love Rpgs. But sometimes I get an itch for a game that is complex enough not to be boring, but simple enough to be FUN! Enchanted cave 2 scratches that itch perfectly. Yeah you lose some treasure when you escape the cave, but when you find those special items that you can take out with you, you want to jump for joy. Skill points to help you customize your hero however you choose and lots of monsters and loot and... save anywhere! Thanks for a great game.. 10V10 Honestly! I was scrolling on steam store looking to 'waste' my cash on some game I honestly wouldn't play. I've bought over 30 games recently and dammmmm I was surprised to see this in the new feed with only one review!!! I opened it... ASTERIODS... Also I saw that little Minecraft easteregg by the way <3](#)

[It's an honestly amazing game worth over \\$2.99](#)
[I will play this in my spare time so much!](#)
[Please keep it fresh with new updates often!!](#)

[ALSO PLZ NERF PUZZLEBEAST. \(I'll also post in forums how to beat it coz I'm so lost with that\)](#)

[Anyways!](#)

[10/10 would play nonstop. Best 2D coop game out there. Get 4-pack and some friends and go kick shadows' asses! 9/10](#)

Wha is good on a Multiplayer game?
The challenge of Player VS Player, correct?
And what if you don't have friends to play with?
Oh well, there must be a story mode, or at least a flat setting to set you up for action, right?
So... what might go wrong here?

Well Metal Drift firstly needs to register to play.
I bought the game guys.... hello?????
Why did you had to force us to register to play.
Gee bad move, whatever.

After the whole proccess I logged in to find what?
Almost empty servers and.... no story mode.

So If I wont convince a firend of mine to buy the game, I can not actually play it, right?
Well guess what, this is a NO from me.

It is a very VERY rare thing putting a thumbs down on a game.
But I can't play it.
No seriously... if I had some friends playign with me I could give it a shot and recommend it on discount.
But now what can i do?!

By the way, graphics are not something special...
gameplay is average, can't tell if it is boring or not though, SINCE I CAN NOT PLAY ALONE....

It's a no for me and I am really sorry.
I know that fanboys will come and rate this down but I don't really care.
Really, think about it.

Spending money on a game you can not enjoy, how would YOU feel?. Its a fine game but I wouldnt recommend it if you dont want to go through rage inducing obstacles. This isnt a typical game to just jump through. This has 20 levels and each one of them will be a real pain to beat. If you are getting this, good luck.. Made a huge mistake walking Yamazaki route first, should have left it for later :) The game is awesome, inspiring, sad and funny, full of emotions and adventures. The OST is mesmerizing. Please do ignore feedbacks on forums on Iba route and pass it anyway - it is great.

15V10 want to erase my memories and play again as first time.

Would be great to have even more routes, e.g. with Itou or Takeda. Please keep up the great work on your games! :). The first official Double Decker train for Train Simulator and it is very fun to drive, despite the annoying door glitch that wasn't fixed in the world's biggest patch. Accelerates like there is no tomorrow.. It's wonderful to be back in Saxton!

- + Genuinely unsettling atmosphere
- + Tons of hotspots with lots flavour and detail
- + Weird but endearing characters
- + Ghost hunting mechanics are well designed
- + Scary
- + Good length for price

- A little buggy (make sure you save often!)
- A little cheesier than I would have hoped at times
- Fart cat (A plus if you enjoy gassy cats)

If you're a fan of The Last Crown then this is a must buy. If you haven't played the Last Crown then go and play that first!
